NEW NOMENCLATURE FOR RUMANIAN LUBRICANTS

The Buletinul de Standardizare (Standardization Bulletin), No 11, 1949, contained an article describing the necessity of a change in the nomenclature of lubricants, replacing commercial names of lubricants manufactured in the Rumanian People's Republic by numbers.

The periodical Petrol si Gaze (Petroleum and Gases), No 1, 1950, contained an article describing the means of interpreting scientific numbers for machine and motor oils, and of their special characteristics, especially the Dean Davis index, viscosity, and eventual use.

Since that time, State Standardization Numbers (STAS) for mineral oils have appeared. The following table contains the former name, new name, STAS, and names of products not assigned such numbers.

<u>Former Name</u>	<u>New Name</u>	<u>STAS</u>	<u>Alternate Designation</u>
